## INTRODUCTION

---

THE 1910 edition of the General Catalogue of Non-Graduates of Williams College, prepared at the direction of the Trustees, was the first of its kind to be published at Williams. No extensive list of non-graduates had been compiled previously, although in the issues of the General Catalogue, of 1880 and of 1885, the names of the non-graduates followed the record of the graduates at the end of each class.

The confusion caused by the World War and the resignation of Mr. Lowe as editor has delayed the publication of the 1920 edition. A large part of the work had already been done under the very capable direction of Miss Christine Price, Librarian-in-Charge, when the task was turned over to the Alumni Secretary, who has simply completed the work along the lines already laid down.

The class lists of the annual catalogues furnish the nucleus of this edition. Every effort has been made to collect data from official sources, and for this purpose catalogues of other colleges, student society catalogues, fraternity catalogues, alumni class reports, biographical and genealogical encyclopaedias, and army records have been thoroughly searched—this in addition to repeated letters sent to all living non-graduates whose addresses are known. In fact all available sources of information have been examined and the results carefully verified. Yet the result at best is incomplete.

The arrangement and plan is similar to the 1920 edition of the General Catalogue of Graduates. The abbreviations should require no explanation. The names of ordained ministers are printed in italics. The dates of the resident years are entered immediately after the name, followed by a semicolon. Dates with omitted figures are frequently due to the fact that men came to College after the catalogue was printed and did not stay until the next one appeared. Degrees of other colleges follow, ar-

ranged in chronological order. The academic record including graduate-study and positions held in colleges, in the army, in the navy, and in civil and diplomatic service is then set forth. Membership in learned societies, as far as ascertained, is given.

The names of non-graduates who have received honorary degrees from the College are *not* included here, but are inserted in the General Catalogue of Graduates. A name which appears in the annual catalogues in more than one class is recorded with the original list, unless the man himself has requested a listing with a later class with which he has been affiliated. This edition contains 3094 names, of which 1306 are starred—of the remaining 1788 undoubtedly quite a number should be starred, but we may safely estimate the number of living non-graduates at close to 1700 names.

This catalogue aims to present in brief form the academic record of all non-graduates. Corrections and additions are cordially requested and should be sent to Room 15, Jesup Hall.
